# Message from ASER Partners

Citizens on the march describes us most aptly. Each year we gather to collect and share evidence on the state of education in Pakistan across the length and breadth of the country. With each passing year we feel that our efforts for data collection and monitoring have not only helped in building a culture of research within our organizations but also helped citizens understand the value of evidence to inform their actions and decisions. The purpose was precisely to bring the challenge of learning outcomes to the center of debates. ASER was initiated in 2008 in Pakistan as a small pilot. We came together to learn the methodology and test it in the field. Today, the Annual Status of Education Report (ASER) or “impact” is the largest citizen led survey providing ranked and gender disaggregated data across households, villages, districts and provinces on students' learning levels, enrollment, attendance, teachers, facilities, multi-grade classrooms, and grants to government schools. The household data provides information on parental education and proxy indicators for income helping us generate information on inequality that assist us to target where the challenges hurt the most and where action must be taken immediately.

As a statement about citizens' efforts and coalition, ASER has become a social movement owned by so many partners, civil society and semi-autonomous organizations mobilizing 10,000 volunteers each year to undertake a public service. We not only inform parents and policy makers alike on learning, access and equity but also create the evidence for right to education and Article 25-A for 5-16 year old children. This year on each of 93,093 households stickers were pasted on how many children did not go to school aged 3-5 and 6-16 so that the neighborhood and heads of household could be reminded each day for taking the action. ASER reveals the potential of citizens' power as Pakistan's largest citizen-led household based survey. It is a hallmark of citizens banding together each year for systematic capacity building for research communication and action.

Our message is that citizens and governments alike must aggressively and creatively take action to improve the quality of education. ASER affects sustained flows of information, generating pressure for educational change propelling individuals, communities and government to take action at each level.

ASER is fiercely collaborative and nationwide managed by Idara-e-Taleem-o-Aagahi (ITA), in partnership with the National Commission for Human Development (NCHD), Sindh Education Foundation (SEF), National Rural Support Program (NRSP), Health and Nutrition Development Society (HANDS), Democratic Commission for Human Development (DCHD) to local institutions such as Brac Pakistan, Community Research & Development Organization (CRDO), Research and Community Development Organization (RCDO), Society for Awareness, Advocacy and Development (SAAD), EHED Foundation, Insan Dost Association (IDA), Change through Empowerment (CTE), Reflect Global, Orchids, G & GS, Azat Foundation, Agosh Welfare Society and Development Association, Haq Development Foundation, Hamza Development Foundation, Beydaar Society, community based organizations and individuals. It is the belief that the education challenge in Pakistan needs to be addressed firmly backed by evidence by the government and all citizens in unison.

These efforts influence the right to education debates on 25-A, MDGs and post 2015 Development Agenda, make learning for all take precedence over schooling for all.

# Message from ASER Development Partners

Pakistan continues to be in a state of education emergency and learning lies at the heart of it. Each year ASER provides insights to the challenges of learning and quality as it does about the children who are out of school. In the efforts to end this emergency, it is critical for student learning outcomes to be measured and monitored regularly disaggregated by gender, geography and wealth.

As supporters of ASER, a learning accountability initiative by the citizens of Pakistan, its value remains for benchmarking. Provincial education sector plans use ASER as a reference document. It is representative for the entire country especially rural areas and increasingly the urban areas as well. In 2014, it covered 144 rural districts and 21 urban districts collecting information on 279,427 children (3-16 years) and 93,093 households in 4698 villages/ blocks. As a large scale country wide assessment, ASER is indeed an asset for Pakistan's education system.

Owned and run by the citizens themselves through a year-long iterative cycle ASER concentrated not just on the survey on learning (literacy and numeracy) and equity, but also focused on dissemination of results to parents, households, communities, teachers unions, politicians, bureaucracy, media and youth groups. The outputs are impressive as this large scale assessment results in multiple knowledge and communication products, such as the provincial reports, district report cards, policy briefs, posters, media toolkit and social media. Together, these products inform the general public and contribute to a national discourse for demand and supply side actions seeking transformation from the bottom-up.

ASER has indeed become acknowledged as an innovative robust approach on learning assessments globally as it has equally strong counterparts in India, East and West Africa, Nigeria and Mexico. It not only informs policy makers and citizens alike on learning but also constituencies beyond Pakistan. In the run up to the final days of the MDGs and the post 2015 Development agenda ASER and its global counterparts across three continents have been actively influencing the debates on learning. A consensus is mounting to ensure that the post 2015 development framework will have an education goal focusing on access plus learning. As development partners our focus is also centered on strategies for improving learning above all and especially for the most vulnerable groups.

We are very pleased at ASER's perfect alignment informing the debates on right to education and legislation for Article 25-A. This is another significant contribution of ASER Pakistan. We acknowledge that ASER findings are quoted each year by the prestigious Economic Survey of Pakistan, in key government documents and in sector analyses both within and outside of Pakistan including the Global Monitoring Report (2013-2014).

We as the supporters of the citizens led initiatives in Pakistan will continue to work with ASER for achieving the goal of Quality Education for ALL Pakistani children. We believe that ASER lies at an important intersection where communities and public sector functionaries work together for positively impacting the lives of millions of children. We appreciate ASER team's diligence in immediately sharing the raw data with the release of the annual report as a public service to research and planning communities in Pakistan and beyond. ASER is indeed a powerful conversation to be engaged with up to 2015 and in the post 2015 phase building multiple constituencies for policy, planning and action on learning and equity.
