Message from ASER Partners

ASER 2015 is a milestone year in a journey that began in 2008/9 by a group of citizens who came together to make the invisible visible for Pakistan, the plight of learning whether children were in, or out of school. It has created a landmark in nationwide assessments through household based surveys covering all 146 rural and selected 21 urban districts across all provinces. ASER presents a snapshot for education indicators annually as a rigorous exercise over the past six years. Each year the campaign has mobilized and trained more than 10,000 volunteers and interviewed 258,021 children (3-16 years) in 83,755 households. This could not happen without partnerships and alliances.

Since its inception in 2008, ASER Pakistan has made an enormous contribution to the evidence base of learning outcomes in Pakistan. It has contributed to now-frequent discussions of education quality at the international, national, and provincial levels. ASER data is frequently cited in reference to learning levels, private school enrollment, and other key education indicators. ASER's contribution has included both providing evidence of the seriousness of the learning crisis (i.e. revealing major deficiencies in even the most basic competencies) and demonstrating how a low-resource model can be used to assess learning on a national scale. (Evaluation R4D)

At the heart of this accountability enterprise lies the energy of citizens as important drivers of change and prioritizes this effort to be owned and run by the citizens themselves. It has a comprehensive dissemination process through which it provides a feedback to the community about their children's learning priming them for action and improvement.

Besides providing systematic information on important education indicators since 2009, this citizen led learning accountability initiative has generated a strong network of civil society partnerships dynamically transforming into a social movement demanding the implementation of Article 25-A.

ASER remains fiercely collaborative and nationwide managed by Idara-e-Taleem-Aagahi (ITA), in partnership with the National Commission for Human Development (NCHD), Sindh Education Foundation (SEF) National Rural Support Program (NRSP), Health and Nutrition Development Society (HANDS), Democratic Commission for Human Development (DCHD) to local institutions such as Community Research & Development Organization (CRDO), Research and Community Development Organization (RCDO), Society for Awareness, Advocacy and Development (SAAD), EHED Foundation, Change through Empowerment (CTE), G & GS, Azat Foundation, Al-Fatah Foundation, Haq Development Foundation (HDF), Hamza Development Foundation (HDF), Sindh Student and Youth Development Organization (SSYDO), Youth Association for Development (YAD) and individuals. We shall remain supportive of citizens' collaboration for not only monitoring learning but also its improvement. We are eager to see this initiative extending to assessment of post primary levels as per target 4.1 of the Sustainable Development Goals (SDGs)

We the citizens of Pakistan representing civil society coalitions – children, youth and adults - working for social justice, influencing laws, policies and implementation through evidence based VOICE in partnership with the Government, Parliamentarians, local Governments, Media, Judiciary, Think tanks, Private sector and communities for collaborative planning, research and implementation are committed to quality lifelong education for ALL being the critical plank for human survival and development. We wish to take this initiative forward for building on a strong foundation for citizen action on improving learning in Pakistan

Message from ASER Development Partners

ASER Report 2015 is a solid testimonial about civil society evidence based activism that has drawn irreversible attention to the crisis of learning, both locally and globally. As we move forward towards the recently adopted Sustainable Development Goals (SDGs) 2030, we are reminded that the 'learning plus access' agenda for SDG 4 would not have happened without the firm backing of the citizen led nationwide assessments in Pakistan, South Asia and Africa. ASER has made the invisible visible indeed and is benchmarked in education sector plans and large scale programs on quality in Pakistan. Since its inception in 2008, ASER Pakistan has been a predictable contributor to the evidence on learning outcomes for both in-school and out of school children. It is embedded in a participatory model, capturing not just national averages but also variations across different population subgroups disaggregated by geography, gender, wealth, language and disability (and combinations of these characteristics) generating powerful equity considerations. It has provided key education stakeholders with quality information regarding the state of learning within the country, district, and community leading towards broad-ranging actions targeted at improving literacy and numeracy competencies.

ASER Results have provided the much needed input to policy makers involved in framing education policies/sector plans in all the four provinces. The findings have found justifiable space in the government economic and social policy documents and are well reflected in the sector plans and policy reviews. As supporters of such a large scale initiative covering entire length and breadth of the country in a minimum period of 3 months each year, it is indeed an asset for us as well as for the education system. In 2015, it has covered 146 rural districts and 21 urban districts collecting information on 258,021 children (3-16 years) and 83,755 households in 4217 villages.

ASER Pakistan has proven that citizens can be reliable data collectors and can play a central role in monitoring whether their governments are making progress against their development targets; illustrating that the model of household based assessment is not only affordable but also a meaningful monitoring mechanism needed to track the SDGs and SDG 4 in particular.

We are pleased to know that ASER Pakistan and its counterparts working across nine countries are now a part of the People's Action for Learning (PAL) Network. This platform will continue to popularize citizen-led assessments as local and global accountability systems. Perhaps most importantly, we hope that the network will offer an opportunity for citizen-led assessments to demonstrate what works in 'improving learning on scale' as well.

We as the supporters of the citizens led accountability initiatives in Pakistan remain committed to Pakistan's roadmap to education improvement and transformation. We shall back ASER's shift from evidence to action where citizens' groups can demonstrate how 'learning improvement' can be secured as irreversibly as has been the attention to the 'learning crisis'. We believe that ASER has a unique role to play informing the general public, inspiring a national discourse and initiate demand for policy and action leading to transformation from the bottom-up. ASER is indeed a powerful conversation to be engaged with in the years to come as a core partner for Article 25 A and SDG 4, building multiple constituencies for policy, planning and action on learning and equity.
