- Ilm-o-Hunar Foundation
- Initiative for Development and Empowerment Axis (IDEA)
- National Commission for Human Development (NCHD)
- PARRS
- Research and Community Development Organization (RCDO)
- Shadow Organization
- Sindh Student and Youth Development Organization (SSYDO)
- Soach Welfare Organization
- Society for Awareness, Advocacy and Development (SAAD)
- Sufi Sachal Organization

# Message from ASER Partners

Under article 25-A, of our constitution, and its respective laws across Pakistan, every child aged 5-16 years is entitled to free and compulsory education. While the Government of Pakistan has taken responsibility, it is not something that they can accomplish alone. Every citizen should take ownership and play their part to make quality education accessible to all. ASER Pakistan is a bold example of organized nationwide action that enables citizens to act as important drivers of evidence, change and prioritizes efforts owned and run by themselves.

ASER Pakistan strives to provide a snapshot of the current education status on learning as a priority in Pakistan and promotes evidence based advocacy for improvement. ASER collects data at the grassroots levels from each child one on one, and has a comprehensive dissemination process through which it provides feedback to the community and brings evidence back to the doorsteps of parents to help them understand the situation of access and learning in their own homes and neighborhoods. ASER has created a landmark in nationwide assessments through household based surveys covering 146 rural and selected 21 urban districts all over Pakistan. The movement started in 2008 and has expanded in scope and scale over the years. Seven years into the exercise, these skills are influencing provincial sector planning in the post 18th amendment phase, and tracking indicators for the 2030 sustainable development agenda. ASER is referenced for policies, planning, strategies and the legislation on the right to education as per article 25-A.

ASER partners play an important role as each year the campaign mobilizes and trains more than 10,000 volunteers to conduct door-to-door assessments. In 2016 alone, ASER interviewed around 255,269 children (3-16 years) in 83,324 households. In order to achieve this, ASER is fiercely collaborative and nationwide managed by Idara-e-Taleem-o-Aagahi (ITA), in partnership with the National Commission for Human Development (NCHD), Health and Nutrition Development Society (HANDS), Democratic Commission for Human Development (DCHD) to local institutions such as Research and Community Development Organization (RCDO), Society for Awareness, Advocacy and Development (SAAD), EHED Foundation, Initiative for Development and Empowerment Axis (IDEA), Change through Empowerment (CTE), Centre for Governance and Public Accountability (CGPA), Al-fatah Organization, Hawa Foundation, G & GS, Azat Foundation, Human Development Foundation, Hamza Development Foundation, Bringing Advancement Kindly and Responsibly (BAKAR), Soach Welfare Organization, Ilm-o-Hunar Foundation, Shadow Organization, PARRS, Sufi Sachal Organization, Human Resource Support Program (HRSP), Sindh Student and Youth Development Organization (SSYDO), community based organizations and individuals.

These efforts influence the right to education debates on 25-A at provincial/ national levels, SDGs and the 2030 Development Agenda, fighting to make equitable learning for all take precedence over schooling for all and mobilizing citizens to take action and learning gains.

# Message from ASER Development Partners

Pakistan continues to be in a state of education emergency and learning lies at the heart of it. Each year ASER provides insights to the challenges of learning and quality in school as it does about the children who are out of school. ASER as a citizen led assessment (CLA) has become a mainstream genre of reporting globally featuring in the UNESCO Institute of Statistics (UIS) catalogue. It is a social movement on learning accountability that has spread to 14+ countries across Asia, Africa and Latin America, many of which are high population countries of the world forming a south-south coalition, called the Peoples Action for Learning (PAL) Network. Through the platform provided by this network, ASER Pakistan and other citizen-led assessments influence local, national and global accountability systems.

**ASER Influencing Global Discussions:** ASER has played a pivotal role in influencing the post 2015 development agenda and goal setting in national, regional and international consultations. It is also part of the Citizen Catalogue of Learning Assessment prepared by UIS. ITA-ASER is an active member of the Global Alliance for Measuring Learning (GAML) set up by the UIS tracking SDG 4.1, 4.2 and 4.6. ASER Pakistan thus helps to support tracking regimes both, in country and globally, rendering data that is sensitive to the broader and specific challenges of equity with respect to gender (SDG 5), poverty (SDG 1) and inclusion. As development partners our focus is also centered on sustainable strategies for improving equitable life-long learning above all and especially for the most vulnerable groups.

**ASER a Rich Open Data Source:** Since its inception in 2008, ASER Pakistan has been a predictable contributor to the evidence on learning outcomes for both in-school and out of school children. Each year, ASER strives to be more inclusive and innovative introducing new indicators to capture different facets impacting education. ASER 2016 has included information on access to social protection and safety net programs in the household surveys reaching out to the most vulnerable and their access to learning.

**ASER Influencing National Discussions:** As supporters of ASER, a learning accountability initiative by the citizens of Pakistan, its value remains for benchmarking. 3 out of 4 of the Provincial education sector plans use ASER as a reference document. In addition, through citizens' voice in influencing policies, improving learning and entitlements, ASER is bringing change in the national and local reforms/laws/rule for 25 A and the conversations on policies at provincial and national levels. It has been brought learning at the centre of discussion and has been influencing provinces/department in their learning plans. Examples include literacy and numeracy drive in Punjab, Early grade learning plans in Sindh, Independent Inspectorate in KP etc. ASER is also been an active contributor to the Economic Survey of Pakistan since 2012, and is used for district Rankings by SDPI -Alif Ailaan, as well as the Global Education Monitoring Report since 2013 and many other research institutions.

As development partners, we believe that ASER lies at an important intersection where communities and public sector functionaries work together for positively impacting the lives of millions of children and we acknowledge the robust efforts of Pakistani citizens, particularly the youth and civil society engaged in education advocacy and monitoring of learning levels at the grass roots level. Besides providing systematic information on important education indicators for the last nine years, ASER has generated a strong network of civil society partnerships dynamically transforming into a social movement to demand the implementation of Article 25-A. We appreciate ITA-ASER team's diligence in sharing the raw data as a public service to research and planning communities in Pakistan and beyond. ASER is truly a basis for evidence based dialogues for the aspirations of SDG 4, building multiple constituencies for policy, planning and action on learning and equity. We congratulate ASER Pakistan in all its endeavors from assessment to improving learning outcomes in Pakistan.
