Message from Local Partners

Annual Status of Education Report (ASER) is a citizen-led, household-based survey. It was conducted in 2018 across 154 rural and 21 urban districts of Pakistan assessing the learning outcomes of children aged 5-16. The survey gives an overview of the learning competencies (grades 2/3-lower primary) of Pakistan's children whether in-school or out of school. This is achieved by mobilizing partners (27) and volunteers to conduct the survey. This citizen-led initiative trains and mobilizes mainly youth volunteers as enumerators, holding the education system accountable. The volunteers/ enumerators are mobilized who have at least a graduate degree, have a mobile phone and a passion to highlight the challenges of the education sector as active citizens. In ASER 2018, 11,000 educated enumerators were provided three days of rigorous field based training, to conduct the oral one-to-one assessment in homes, triangulated by information from households and visits to local schools.

Through this training and experience, ASER enables our ordinary-extraordinary citizens every year to assess the quality of education in Pakistan through a large body of open source evidence. We as local partners, who take part every year, reach out to randomly selected distant communities and households, have gained confidence to knock on doors to ask about a fundamental constitutional right under article 25 a. We take immense pride in becoming a part of this accountability initiative, which is also fed into the Right to Education (RTE) Campaigns and SDGs 2030/SDG 4 tracking led by Idara-e-Taleem-o-Aagahi (ITA) and many civil society organizations in Pakistan. Citizen Led Assessments undertaken in 14 countries as a South-South initiative are now formally part of the UNESCO Institute of Statistics (UIS) Catalogue of Assessment. These assessments have contributed to the global up-gradation of the SDG 4.2.1 a or lower primary indicator from a tier III classification to tier II that will ensure that children's learning challenges get addressed early.

ASER Pakistan has been an important instrument in the past in impacting education polices and sector plans at the federal as well as the provincial levels. The government of Pakistan recognizes ASER and the data collected, making ASER Pakistan a credible and authentic source of data, especially on the learning metrics combining equity and inclusion. We take pride in ensuring that the assessment leads to actions as well. ITA's learning and equity initiatives that use ASER findings in different regions of the country, ensure that the learning crises can be mitigated through different interventions. These accelerated learning programs for never enrolled, drop outs and at risk in schools take cue from ASER, such as Chalo Parho Barho-CPB (let's read and grow), Right to Education, Siyani Sahelian (second chance program for adolescent girls) are large service delivery programs impacting inclusively the twin crisis of learning and access-making 12 years of education a possibility for both girls and boys. The education crisis in Pakistan, can only be resolved if evidence-based data gathered, can be put to use by designing programs that aim to provide targeted solutions. It is important to realize that ASER Pakistan does not only collect data to highlight education challenges in Pakistan, it helps us identify the most under-privileged areas and people within Pakistan, surviving under extreme poverty. This information helps the government to target, plan and spend better with measurable positive outcomes.

The Education Sector Plans under preparation as well as all evaluations, program proposals cite ASER findings widely in all provinces of Pakistan Sindh, Balochistan, Punjab, and Khyber Pakhtunkhwa. The tools are also being used to assess learning outcomes of children by organizations/ practitioners such as Oxford Policy Management, SABAQ, The Citizens Foundation etc. It is important to realize that ASER is a huge data source, accessible to all as a public good, used extensively by government, non-government organizations, universities and development partners alike to advance planning, research and timely actions for better education outcomes. We, as local partners appreciate the ASER model and the way it has created an eco-system to mobilize the youth/citizens of Pakistan for furthering education targets/goals. ASER's strength lies in its volunteerism and the citizen-led effort. ASER/ITA is part of the largest citizen led movement called the People's Action for Learning (PAL) network working in Latin America, Africa and Asia on both assessment and action strands. We believe, that ASER /ITA Pakistan, through solid partnerships has the capacity to bring a meaningful and positive impact for education in Pakistan in the years to come as an entitlement for each child, adolescent and youth; and we will always be there as believers and activists for such a citizen led movement -from assessment to action !

Message from Development Partners

Pakistan faces a grave challenge for educating its youth. At present, about 22.5 million children are out of school and Pakistan's low expenditure on education as a percentage of its GDP, reported by the Global Monitoring Report 2017-2018, gives a very bleak picture of the education landscape in Pakistan. In such conditions, the Annual Status of Education Report, ASER, provides a platform to assess where Pakistan's children lie on basic learning levels' spectrum. ASER is a citizen-led household-based survey that assesses the literacy and numeracy levels of children aged 5-16 years, from all over Pakistan. Led by Idara-e-Taleem-o-Aagahi (ITA), ASER was conducted this year with the help of 27 partners having nationwide presence and mobilizing as many as 11,000 educated volunteer/enumerators provided with three days of field-based training to conduct the oral one-to-one assessment in homes, triangulated by information from the households and visits to the local schools.

We, as the development partners for ASER Pakistan, are highly invested in promoting inclusive and equitable education and help to mitigate the effects of the education crisis that Pakistan is going through. We hope to work for a more stable Pakistan. We encourage a bottom-up approach that is inclusive and brings multiple stakeholders together in the education sphere. We believe that ASER Pakistan aligns with these objectives of ours and is an important player in the education crisis that Pakistan is facing.

ASER's Interventions: ASER Pakistan's findings help Idara-e-Taleem-o-Aagahi (ITA) create interventions in the most affected parts of the society, where educational outcomes are extremely poor and need attention, to achieve the goal of Education for ALL. ITA's programs like the accelerated catch up learning improvement program for out of school and in-school children at risk (known as Chalo Parho Barho-CPB) and Siyani Sahelian (Advancing Action for Adolescent Girls) have been initiated based on ASER data. We commend ASER for being of crucial importance in identifying the most neglected and marginalized communities in the education landscape of Pakistan. ASER Pakistan is also working on making the survey more inclusive by introducing a section on children with disabilities. ASER assessment tools are also being translated into Pakistan Sign Language (PSL) and Braille so that children with disabilities can also be tested. This would help achieve the goal of inclusive education as listed in Goal 4 of the Sustainable Development Goals (SDGs), and would give a quick snapshot of what complexities lie in bringing education to children with disabilities. It is also heartening to know that the assessment tools have been finalized by all assessment bodies as critical stakeholders for validity of the instruments.

ASER's Global Impact and Support from Development Partners: ASER is not only impacting the local but also the global sphere of education. It is conducted in about more than 14 countries. People's Action for Learning (PAL) network is a consortium of these countries which come together to share knowledge and have a global impact of their findings. Globally, the SDGs (Agenda 2030) which has a major focus on inclusion and equity which we, as the development partners, highly value and work towards and is exactly what ASER strives for. Goal 4 of the SDGs - Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all - lies at the heart of ASER and aligns with our objectives. It is this goal of Education for All that makes ASER extremely important and relevant in today's age. The ASER tool is mapped to lower primary competencies of grades 2-3 or SDG 4.1.1a; this indicator has been recently upgraded (Nov. 2018) by the GAML & UIS from being a tier three to tier two indicator as many more countries are beginning to report on this learning level as evidence for urgent actions.

ASER's Local Impact: ASER Pakistan has had a significant influence on the national and provincial debate about Article 25-A (the right to education) and has led to many policy-dialogues, bringing various stakeholders together at the same platform. This is one of the major struggles that we, as development partners, have been supporting since the education emergency crisis in Pakistan. ASER Pakistan is also part of the Voluntary National Review (VNR) process at the federal and provincial level for the SDGs, which is to be held at the UN High Level Political Forum in July 2019. All provincial and national governments recognize and value ASER data in high regard and often quote it.

We recognize the efforts of ASER volunteers and the affiliated youth, the civil society and ITA for conducting and disseminating ASER data. The advocacy campaigns and interventions that follow are a step towards making Education for All possible in Pakistan. We believe, that the data and information provided by ASER helps us realize the challenges we face in educating our children.
