ABOUT THE SURVEY
SAMPLE DESIGN – RURAL (Villages)

**Total Population:** The total population of this survey consists of 155 rural districts of Pakistan.

**Sampling Frame:** Each district is provided with

A village list.
Data from the Population Census 2017 on the total number of households.
Total population of each village in the list.

**Sample size and its Allocation:**

Keeping in view the variability of the key variables, population distribution and field resources, a total sample of 600 households pertaining to 20 households from each village is being used.
Sample primary sampling units (PSUs) have been considered sufficient to produce reliable estimates with 5% margin of errors at 95% level of confidence.
The detailed allocation plan is shown below:

**Sample Design:** A two stage sample design was adopted:

**First stage:** 30 villages selected using the provisional village directory of the 2017 census\(^1\).

**Second stage:** 20 households are selected in each of the 30 selected villages.

**Selection of Primary Sampling Units (PSUs):** Villages of districts have been taken as PSUs:

Sample PSUs have been selected using probability proportional to size (PPS) method.
Every year, 20 villages from the previous year are retained and 10 new villages are added. Ten villages are dropped from the previous year’s list and 10 new villages are added from the population census village directory. The 10 new villages are also chosen using PPS.
The 20 old villages and the 10 new villages give us a “rotating panel” of villages, which generates better estimates of changes.

**Selection of Secondary Sampling Units (SSUs):** Households have been treated as secondary sampling units (SSUs).

Based on actual households in each sample PSUs, 20 households have been selected.

We divide the village into four parts:
- In each of the four parts, started from the central location and pick every 5\(^{th}\) household on the left hand-side in a circular fashion till 5 households are selected from each part.

**Selection of School**
- 1 government school from each selected village (Mandatory)
- 1 private school from each selected village (Optional)

SURVEY METHODOLOGY

WHAT TO DO IN THE VILLAGE

Contact Village Elder: Introduce yourself to the village elder, councilor and/or to other senior members of the Panchayat. As you walk to reach the village elder, Panchayat or Councilor, talk to different people and ask about the village. Tell them about ASER. This initial walking and talking may take more than an hour. Get the approximate number of households in the village from the Councilor.

HOW TO INTRODUCE ASER

It is important that ASER is introduced clearly and simply to the villagers. Following is a suggested way of explaining your purpose of visiting the village and the ASER survey: Our team is doing a survey on quality of education in Pakistan called Annual Status of Education Report (ASER). We want to know if the children of age 3-16 are learning anything in the school or outside of it i.e. in home. We are conducting this research in more than 4,500 villages and in 155 rural districts of Pakistan and your village has been selected as one of them. We will also go to one government school here and one private school (if there is one in the area) to look at their standard. We will select 20 households in your village and ask children to read and do mathematic sums etc. This way you will also know the standard of education, and as we ask the government, the village should also come together to improve educational standards.

The next step is to identify the households:

- Talk to people: How many different hamlets/sections are in the village? Where are they located? What is the social composition of the households in each hamlet/section? What is the estimate of households in each hamlet/section? How many government and private schools are in the village? Tell them about ASER.

It is often helpful to first draw all the roads or paths coming into the village and going out of the village. It helps to first draw a rough sketch on the ground so that people around you can see what is being done. Mark hamlets, schools, households etc. with landmarks. With the help of the community members, identify different hamlets and their center point.
HOW TO SELECT HOUSEHOLDS

In the entire village, information will be collected for 20 randomly selected households.

Go to each hamlet/section. Try to find the central point in that habitation. Stand facing the houses in the center of the habitation. Visit every 5th house from the left-hand side in the habitation (e.g. 1st house, 11th house, 16th house, etc.). Get information about the household and children following instructions in the next section.

- **House Closed:** If the selected house is closed or if there is nobody at home, note that down on your compilation sheet as “House Closed”. This household DOES NOT count as a surveyed household. Move to the next/adjacent open house. Continue until you have 5 households in each hamlet/section in which there were inhabitants.

- **No Response:** If a household refuses to participate, note that down on your compilation sheet as “No Response”. However, as above, this household DOES NOT count as a surveyed household. Move on to the next house. Continue until you have 5 households in each hamlet/section in which not only were the inhabitants present, but they also participated in the survey.

- **No Children:** If there are no children or no children in the age group of 3–16 years in a household but there are inhabitants, INCLUDE THAT HOUSEHOLD. Take all the relevant information like the name of the family head, age and education related information of the mothers, if any. Such a household WILL COUNT as one of the 5 surveyed households in each hamlet/section.

Stop after you have completed 5 households in each hamlet/section. If you have reached the end of the section before 5 households are sampled, go around again using the same every 5th household on the left-hand side rule. If a surveyed household gets selected again, then go to the next household. Continue the survey till you have 5 households in the section.

Now move to the next selected hamlet/section. Follow the same process.

Make sure that you go to households ONLY WHEN children are likely to be at home. This means that the day of the household survey should be a Sunday or holiday.

If every house is turning out to be a No Response house, think about your team and strategy. It may be because there are two male members going to the houses hence refused permission.
Instructions:

1. Find central point in a hamlet. Stand facing the dwellings.

2. Survey every 5th HH (household) occurring on the Left Hand Side.

3. In case of a locked HH or if there is nobody at home, note that down as ‘House Closed’ and move to the next open house.

4. If a HH refuses to participate, note that down as ‘No Response’ and move to the next HH.

5. If there are no children or no children in the age group of 3-16 years in a HH but there are inhabitants, include that HH.

6. If you reach the end of the hamlet before five (5) HHs are sampled, go around again using the “every 5th HH rule”.

In the 5th HH ask how many ‘chulhas/kitchens’ are there? If there are more than 1, then randomly select any one of the ‘chulhas/kitchens’. After completing survey in this house proceed to the next 5th HH.
**WHAT TO DO IN EACH HOUSEHOLD**

**Basics of the household sheet:** Following is some basic information required to be filled in the household sheet before the start of the survey.

- **Household ID:** Write the household number (e.g. 1, 2, 3, .......20)

- **Name of Family:** write down the name of Family head.

- **Total household members:** Write down the number of male and female members eating from the same kitchen. This should include children also.

- **Date and Time:** Write down the date, day, start & end time on the day of the survey visit.

- **Surveyors:** Write down the names of the surveyors.

- **Village identification:** Carefully fill out the relevant name of the village, tehsil/taluka, district and province.

**In Each Sampled Household:** We will note information about the household and all the children (3-16 years), their mother and father who live in the household on a regular basis.

**Household with multiple kitchens:** If there is more than one kitchen (chulhas) in the selected household, then randomly select any one of the kitchens in the household and record the total number of family members who eat from that chosen kitchen.

**Children 3 to 4:** On the household sheet, note down child’s name, age, whether they are attending Kachi or any other form of pre-school centre. **We will NOT test children who are under 5 years of age.**

- Ask all children in this age group their current schooling status, meaning whether the child is currently enrolled in kachi or any other school, dropped out of school or was never enrolled in any school.
- Ask all (enrolled and dropped out) children if they take any private supplementary tuition (paid classes in addition to regular school).
- Also ask the enrolled children if they go to the specific school which you have/will be surveying.

**Children 5 to 16:** On the Household sheet, note down child’s name, age, gender and all other details.

- Ask the current schooling status of each child, i.e. whether the child is currently enrolled in school, dropped out of school or was never enrolled in any school.
- If the child is enrolled then note down the class which the child is attending at the time of the survey and the type of school each child is going to, i.e. government, private, madrassah or any other type of school.
- Ask all (enrolled and dropped out) children if they take any private supplementary tuition (paid classes in addition to regular school).
- Also ask the enrolled children if they go to the specific school which you have/will be surveying.
- **All children in this age group (5 to 16) will be tested in basic reading, arithmetic and English.** (We know that younger children will not be able to read much or do sums but still follow the same process for all children so as to keep the process uniform). Ensure that the child is comfortable before and during the test and that sufficient time is given to each child.
- **Parents’ Education:** Following information regarding parents education will also be recorded
  - Total number of Children (0-16)
  - Whether mother and/or father have gone to school?
  - Mother and/or father’s education (Highest class completed)
  - Do not take information if the father is dead.

**Out of school children (drop outs and never enrolled children)**

- Ask the child if s/he has dropped out and the last class that was passed. Also ask for the reason of dropping out or being never enrolled (such as law and order, poverty, flood, school building shifted by government or others).
- Even the dropped out and never enrolled children aged 5 to 16 have to be tested.
OTHER THINGS TO REMEMBER:

- **Non-resident children**: Do not survey children who are visiting their relatives and friends in the sampled village.

- **Older children**: Often older girls and boys (in the age group 11 to 16) may not be thought of as children. Be sensitive to this issue and therefore avoid using words like “children”.

- **Children out of the village**: If there are children in the family but who are not present in the village during the survey, do not take their details.

- **Mothers under 16 years of age**: Often in villages, you can come across mothers who are less than 16 years of age. Information on them will be collected as a mother as well as a child between the age 5 to 16 years, and they will also be tested in all three assessments.

> Many children may come up to you and want to be included in the process out of curiosity. Do not discourage these children. You can interact with them. But concentrate on the fact that data must be noted down **ONLY** for children from households that have been randomly selected.

**Household Indicators**: All information on household indicators is to be recorded based, as much as possible, on observation and evidence. However, if for some reason you cannot observe it note down what is reported by the household. This information is being collected in order to link education status of the child with household economic conditions.

Type of house the child lives in: Types of houses are defined as follows:
