# Message from Local Partners

Annual Status of Education Report (ASER) is a citizen-led, household-based survey. It was conducted in 2019 across 155 rural and 20 urban districts of Pakistan assessing the learning outcomes of children aged 5-16. The survey gives an overview of the learning competencies (grades 2/3-lower primary) of Pakistan's children whether in-school or out of school. This is achieved by mobilizing partners (33) and volunteers to conduct the survey. This citizen-led initiative trains and mobilizes mainly youth volunteers as enumerators, holding the education system accountable. The volunteers/ enumerators are mobilized who have at least a graduate degree, have a mobile phone and a passion to highlight the challenges of the education sector as active citizens. In ASER 2019, 11,000 educated enumerators were provided three days of rigorous field based training, to conduct the oral one-to-one assessment in homes, triangulated by information from the households and visits to the local schools. In few districts, volunteers even collected the information for the first time on a tablet, providing real time information.

Through training and experience, ASER enables our ordinary-extraordinary citizens every year to assess the quality of education in Pakistan through a large body of open source evidence. We as local partners, who take part every year, reach out to randomly selected distant communities and households, have gained confidence to knock on doors to ask about a fundamental constitutional right under article 25 A.

We feel that our contribution is extremely important, not just because we provide assistance in collection of the annual data mapping children's learning progress, but because our aim is to put this information into the hands of parents and other local actors on the ground, enabling them to hold schools and local officials accountable for learning outcomes. We take immense pride in becoming an indispensable part of the ecosystem for change: both as a means to raise awareness around low learning levels and a force for bottom-up accountability and action to improve children's learning in schools.

ASER Pakistan has played a fundamental role in shifting national and global conversations to improving learning in school, by contributing to an increased focus on learning outcomes and sharing evidence highlighting the seriousness of the learning crisis. ASER Pakistan is a great example of showing how assessment data can support and lead to action towards improvements in children's learning. ITA's learning and equity initiatives that use ASER findings in different regions of the country, ensure that the learning crises can be mitigated through different interventions. These accelerated learning programs for never enrolled, drop outs and at risk in schools take cue from ASER, such as Chalo Parho Barho-CPB (let's read and grow), Right to Education, Siyani Saheli (wise friends-for adolescent girls) are large thriving service delivery programs bringing a change impacting inclusively the twin crisis of learning and access-making 12 years of education a possibility for both girls and boys.

With these successes in hand, ASER Pakistan has the potential to go to great distance from data to action. Partnerships facilitated by ITA Teams through ASER Pakistan, not only enhance learning opportunities but also provide a platform for all civil society organizations to come together and build solutions with local people at the centre. We believe, that ASER/ITA Pakistan, through solid partnerships has the capacity to bring a meaningful and positive impact for education in Pakistan in the years to come as an entitlement for each child, adolescent and youth; and we will always be there as believers and activists for such a citizen led movement-from assessment to action!

# Message from Development Partners

Pakistan faces a critical education access and learning challenge. According to latest available data from Government (Pakistan Education Statistics 2016-2017), about 22.8 million children are out of school and those that go to school often do not achieve even basic learning levels. The Sustainable Development Goals adopted by 193 member countries in September 2015 also represent a renewed focus for inclusive, lifelong and equitable education. In this context, the Annual Status of Education Report (ASER) provides a platform to assess where Pakistan's children lie on the spectrum of basic learning. ASER is a citizen-led household based survey that assesses the literacy and numeracy levels of children aged 5-16 years, from all over Pakistan. Led by Idara-e-Taleem-o-Aagahi (ITA), ASER was prepared this year with the help of 33 partners, having nationwide presence and mobilizing as many as 11,000 educated volunteer/enumerators. Volunteer enumerators received three days of field-based training to conduct the oral one-to-one assessment in homes, triangulated by information from the households and visits to local schools.

As development partners supporting ASER Pakistan for many years, we are highly invested in promoting inclusive and equitable education to improve learning in Pakistan. We are cognizant that half of school-going children in Pakistan do not learn the basics despite having spent at least 4 years in school and therefore commend ASER for producing this very important report that continues to bring attention to the ongoing learning crisis in this country.

ASER Pakistan along with other member countries of the PAL Network ([www.palnetwork.org](http://www.palnetwork.org)) has advocated for the inclusion of an early grade indicator in the new set of global goals. PAL countries' - including Pakistan (represented by ASER Pakistan) – and other key stakeholders' collective insistence on the need for early grade indicators in the post-2015 framework, ensured that SDG Indicator 4.1.1 included inclusive and equitable data on the percentage of children at Grades 2/3 who have learned the basics. Data from ASER Pakistan and other citizen-led assessments have contributed to the indicator being progressively upgraded by the Inter-agency and Expert Group (IAEG) from a Tier III Indicator (meaning it lacks an internationally established methodology) to a Tier II indicator (meaning there is a clear methodology in place but a lack of adequate data) in November 2018; with the indicator upgraded again from a Tier II to a Tier I indicator (meaning there is an internationally established methodology with regular data produced) in October 2019. The inclusion of citizen-led assessment data in measuring progress against SDG indicator 4.1.1 ensures that the hardest-to-reach children remain visible in education data at the sub-national, national and global levels. This includes data collected on: out-of-school children, by socioeconomic status, gender, age, language, and disability.

We believe that ASER Pakistan, already collecting information on the above-mentioned indicators, makes a significant contribution in producing internationally comparable data on the acquisition of foundational skills in a process to hold national and global-level institutions accountable for delivering on the promises that are enshrined in SDG 4. The education crisis in Pakistan can only be resolved if evidence-based data is gathered and can be put to use by introducing programs that aim to provide targeted solutions. It is important to realize that ASER Pakistan does not only collect data to highlight education challenges in Pakistan; it helps us identify the most under-privileged areas and people within Pakistan, surviving under extreme poverty. This information helps the government to target better, plan better and spend better with measurable positive outcomes. The Education Sector Plans under preparation as well as all evaluations, program proposals cite ASER findings widely in all provinces of Pakistan Sindh, Balochistan, Punjab, and Khyber Pakhtunkhwa. The tools are also being used to assess learning outcomes of children by organizations/ practitioners such as Oxford Policy Management, SABAQ, TCF etc.

As development partners, we advocate for the continued expansion and diversification of data to measure learning progress early on, in order for timely corrective measures to be taken to ensure better learning gains and successful transitions. We stand by all endeavors, at local, national, regional and global levels to further the learning agenda and its tracking to inform policy and practice. We endorse citizen-led, household based assessments as an inclusive mechanism to track the learning progress for all children, regardless of their age, gender or schooling status.

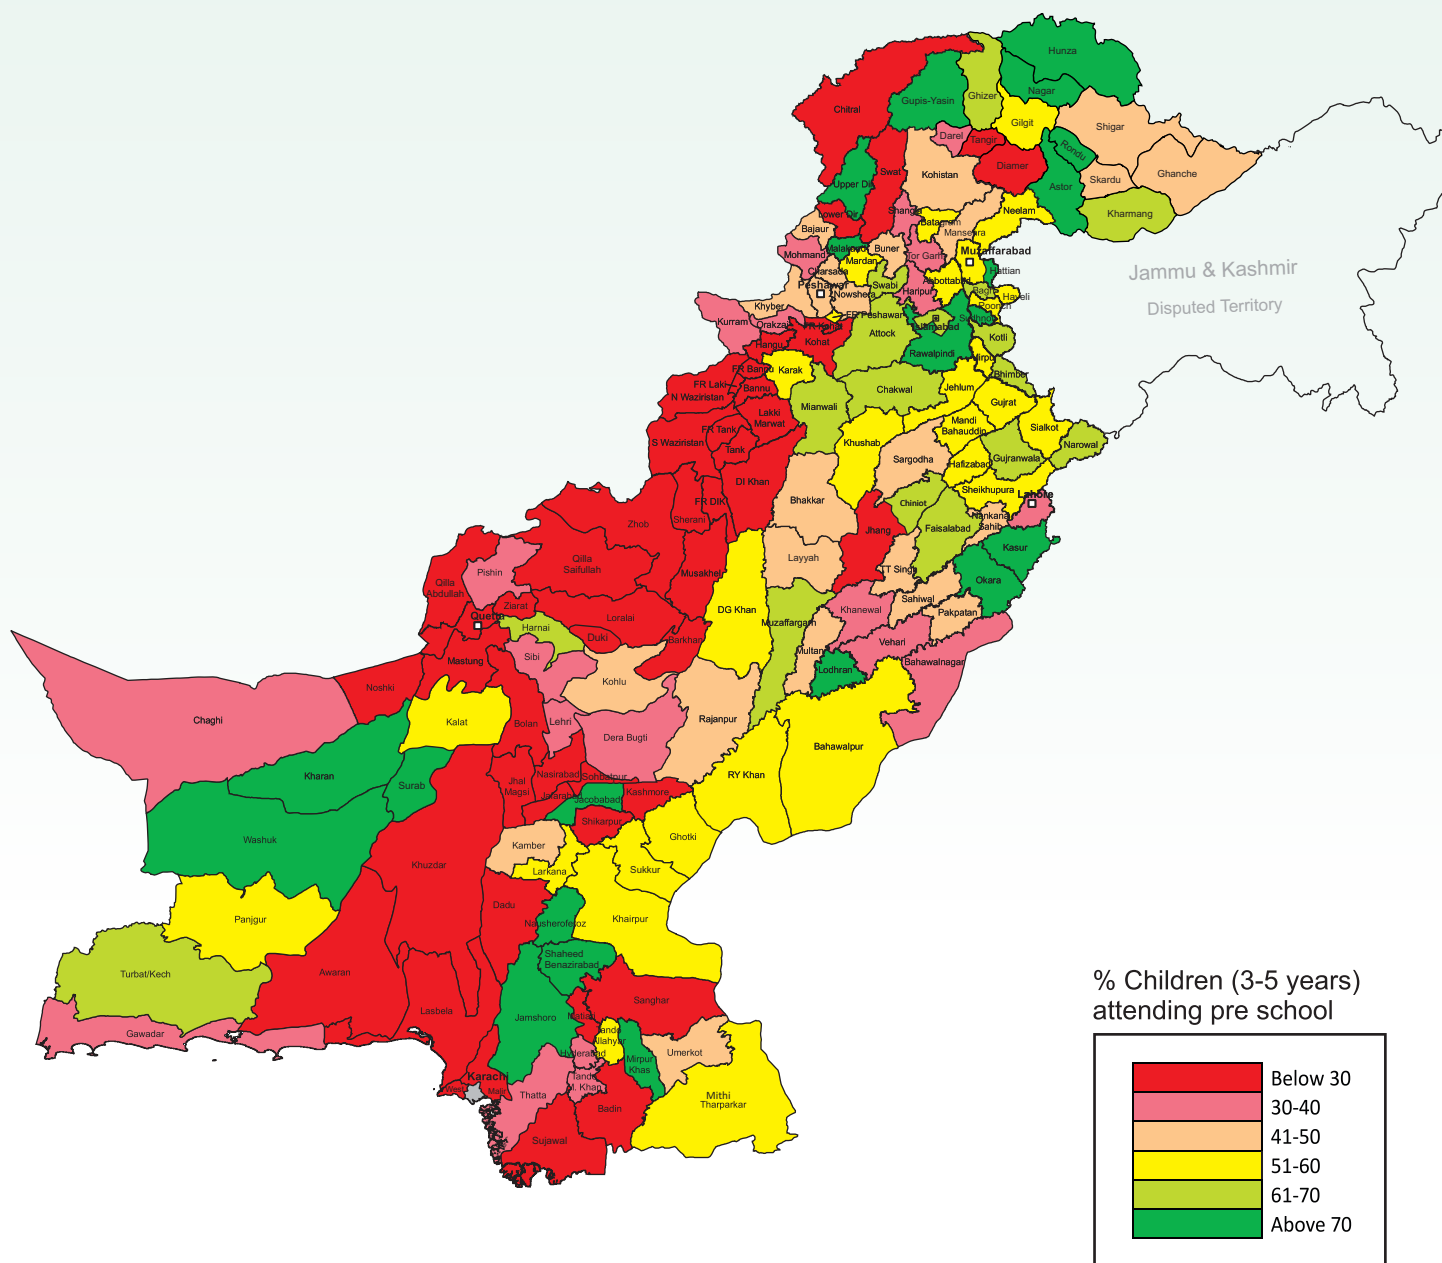

Finally, we would like to recognize the efforts of ASER volunteers and the affiliated youth, the civil society and ITA for conducting ASER and disseminating the ASER data and findings. We hope the findings of the current report will also inform policy debate and reform to improve education quality.
