Message from Local Partners

Annual Status of Education Report (ASER) is a citizen-led, household-based survey. It was conducted in 2021 during Covid-19 across 152 rural districts of Pakistan assessing the learning outcomes of children aged 5-16 while also collecting information on the impact of the pandemic on learning and other household indicators. The survey gives an overview of the learning competencies (grades 2/3-lower primary) of Pakistan's children whether in-school or out of school. This is achieved by mobilizing partners (20) and volunteers to conduct the survey. This citizen-led initiative trains and mobilizes mainly youth volunteers as enumerators, holding the education system accountable. The volunteers/enumerators are mobilized who have at least a graduate degree, have a mobile phone and a passion to highlight the challenges of the education sector as active citizens. In ASER 2021, 11,000 educated enumerators were provided three days of rigorous field based training, to conduct the oral one-to-one assessment in homes, triangulated by information from the households and visits to the local schools.

Through training and experience, ASER enables our ordinary-extraordinary citizens every year to assess the quality of education in Pakistan through a large body of open source evidence. We as local partners, who take part every year, reach out to randomly selected distant communities and households, have gained confidence to knock on doors to ask about a fundamental constitutional right under article 25 A.

We feel that our contribution is extremely important, not just because we provide assistance in collection of the annual data mapping children's learning progress, but because our aim is to put this information into the hands of parents and other local actors on the ground, enabling them to hold schools and local officials accountable for learning outcomes. We take immense pride in becoming an indispensable part of the ecosystem for change: both as a means to raise awareness around low learning levels and 'a force for bottom-up accountability and action to improve childrens learning in schools.

With these successes in hand, ASER Pakistan has the potential to go to great distance from data to action. Partnerships facilitated by ITA Teams through ASER Pakistan, not only enhance learning opportunities but also provide a platform for all civil society organizations to come together and build solutions with local people at the centre. We believe, that ASER/ITA Pakistan, through solid partnerships has the capacity to bring a meaningful and positive impact for education in Pakistan in the years to come as an entitlement for each child, adolescent and youth; and we will always be there as believers and activists for such a citizen led movement -from assessment to action !

Message from Development Partners

The massive and unprecedented disruption due to the Covid-19 pandemic has raised many challenges for education systems globally, and in Pakistan. Within the larger set of questions of the economy and health, there are many related to children and their education. This was a crisis within a crisis: even before the pandemic, learning levels were too low with 75% of children unable to read a simple story by the age of ten. The government responded to the pandemic by shutting down schools and, within days, coming up with solutions for continuity of learning. The efforts of the government through partnerships for reaching out to children at their homes and in their communities during the pandemic are to be lauded.

Although a lot of digital content was volunteered, crowdsourced and transmitted to help children continue to learn while at home, there is limited evidence on the extent to which this content reached children. In Pakistan, a number of studies have been done on the impact of the COVID-19 pandemic since the first extended lockdown was announced, but few cover learning outcomes from the layered lens of equity and gender, any across various geographies.

The longstanding citizen-led ASER Pakistan (rural) Report is welcome evidence from 152 districts nationwide. Committed to the principle of 'from assessment to action' for learning, ASER Pakistan has been collecting rich data trends on quality, inclusion, access and equity since 2010. Led by teams from Idara-e-Taleem-o-Aagahi (ITA) and its partners, it is a social movement for learning accountability and action. ITA and its 20 field partners including the National Commission for Human Development (NCHD) mobilized 11,000 educated volunteer/enumerators for this mammoth and critical undertaking.

The value of ASER Pakistan 2021 (rural) covering all provinces and areas of the country is its scale. It reached 247,978 children (3-16 years) from September-November 2021, a rare period of 'back to school' in relative continuity during COVID-19, barring brief school closures in some districts of the country. The method and practice of citizen-led data collection for learning at scale is a juggernaut for measuring quality, equity, access and inclusion for 3-16 year-olds, providing a rare and consistent look of the situation across the country.

As development partners supporting ASER Pakistan for many years, it is a bold public good, its methodology is validated by the UNESCO Institute of Statistics (UIS) and the data utilised for national global reports and sector plans to take action for improved foundational literacy and numeracy. We remain highly invested in promoting inclusive and equitable education to improve foundational learning in Pakistan. We are cognisant that half of school-going children in Pakistan do not learn the basics despite having spent at least 4 years in school and therefore commend ITA for producing an important and timely report that brings constructive attention to the ongoing learning crisis, especially during Covid-19, for positive mitigation measures. We thank ITA, its partners, youth and volunteers in Pakistan for this important report.

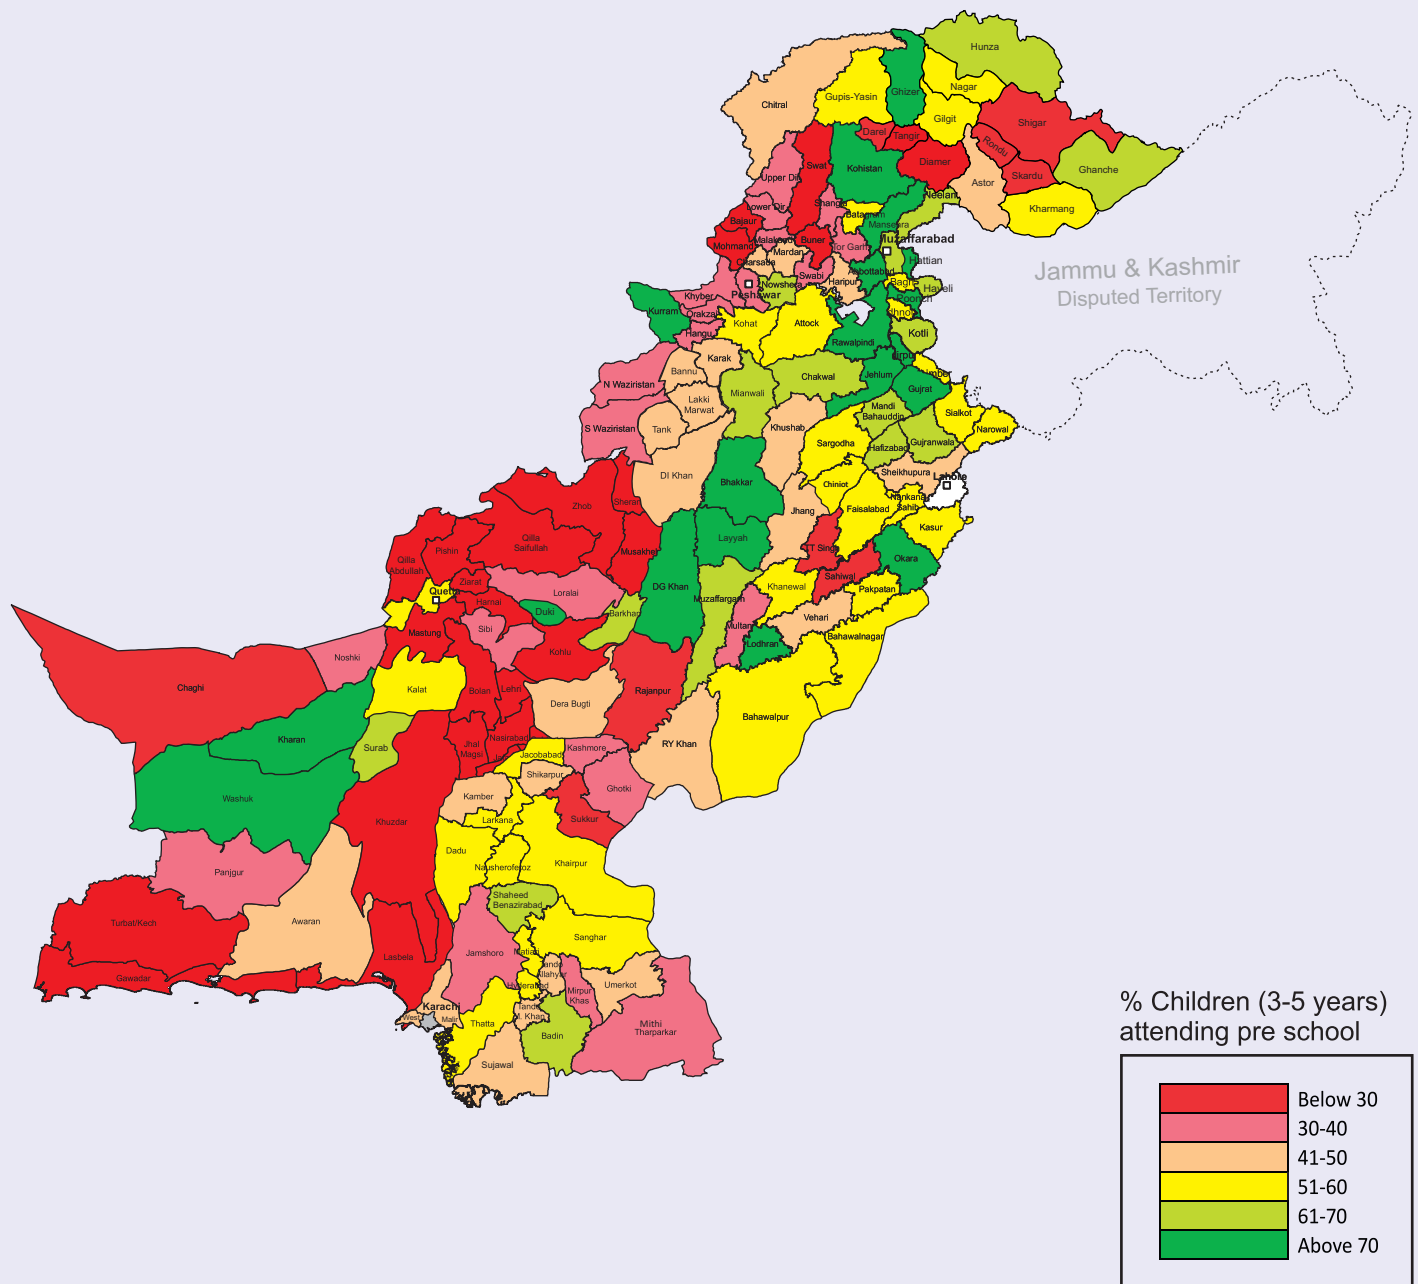

The value of ASER Pakistan is anchored in ownership by key stakeholders and decision makers committed to bold actions to meet national aspirations and targets of article 25-A and SDG 4.
