## Khyber Pakhtunkhwa (Rural)

## Sample Composition

- The ASER 2012 survey was conducted in 23 out of 25 districts of Khyber Pakhtunkhwa (KP). This covered 13,702 households in 688 villages in the province.
- Detailed information was collected on 40,606 children ( $62 \%$ male, $38 \%$ female) aged 3-16 years. Out of these, children aged 5-16 were also tested for language and arithmetic competencies.
- School information on both public and private schools was collected. A total of 1,024 schools were surveyed, out of which 666 were government ( $64 \%$ primary, $5 \%$ elementary, $12 \%$ high, $19 \%$ others ${ }^{1}$ ) and 358 were private schools ( $24 \%$ primary, $35 \%$ elementary, $38 \%$ high, $3 \%$ others).
- Thirty percent of the government schools were boys only, $61 \%$ were girls only, and $9 \%$ were co-education schools. Seventeen percent of the private schools were boys only, $2 \%$ were girls only, and $81 \%$ were coeducation schools.

A large number of children continue to be out of school: sixteen percent of all school-aged children in KP are out of school.

- Of all children aged 6-16 years, $84 \%$ are reported to be enrolled in schools.
- Sixteen percent of all school-aged children have either dropped out of school ( $4 \%$ ) or have never been enrolled in a school (12\%). ASER 2011 showed that $15 \%$ of children were out-ofschool in KP which reflects persistent access issues for some children in rural KP.
- In line with the findings from ASER 2011, more girls than boys continue to be out-of-school.
- For every fourteen children enrolled in Class 1 , only six children are enrolled in Class 10.

[^0]* In 2011, 14 districts of Khyber Pakhtunkhwa were surveyed.

| $\%$ Children in different types of schools |  |  | \% Out-of- <br> school |  | Total |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Khyber Pakhtunkhwa (Rural)

Private schools absorb a large share of school-aged children: thirty-one percent of all school-going children are enrolled in non-state schools in KP.

- Twenty-eight percent of the children enrolled in private schools are girls and 72\% are boys.
- Approximately $1 \%$ of the total school-attending population attends madrasah schools and less than 1\% attends other non-formal institutes.

## More than half of pre-primary age children are not attending any form of schooling.

- A total of 8,752 children aged from three to five were reached during the ASER 2012 survey in KP.
- Of the children who do attend pre-primary education, $63 \%$ are enrolled in public institutions and $37 \%$ in private sector.

| \% Children who attend different types of pre-schools |  |  |  |  |  |  |

## Khyber Pakhtunkhwa (Rural)

Learning levels of children are assessed through specific language and arithmetic tools ${ }^{2}$. The same assessment is given to children between the ages of 5 to 16. The literacy assessments are designed in a way that it covers up to Class 2 level text according to the national curriculum. The arithmetic tool covers up to Class 3 level text.

## Learning levels have improved since last year but still remain poor: fifty-seven percent children from Class 5 still cannot read Class 2 Urdu/Pashto story.

- Analysis of reading ability shows that $45 \%$ of Class 3 students were able to read sentence and nearly $55 \%$ could not.
- In ASER $2011^{3}, 32 \%$ of Class 5 students were reported as being able to read story compared to $43 \%$ of Class 5 students who could read story in 2012.

| Urdu: Class-wise \% children who can read |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Class | Nothing | Letters | Words | Sentences | Story | Total |

| 10 | 0.0 | 0.0 | 0.9 | 8.9 | 90.2 | 100 |
| How to read: 9.5\% (5.3+4.2) children of Class 1 can do subtraction |  |  |  |  |  |  |

## Students in private schools outperform students in government schools.

- Forty percent of Class 5 students in government schools were able to read a story in Urdu (the highest level of competency tested) compared to $52 \%$ of Class 5 students in private schools.
- In English, 44\% of Class 5 students in government schools were able read sentences compared to 56\% of Class 5 students in private schools.
- This pattern of better performance among private school students is also reflected in arithmetic. Fiftyone percent of Class 5 private school children were able to do division problems of Class 3 (the highest competency tested) as against $42 \%$ of Class 5 government school children.

## Khyber Pakhtunkhwa (Rural)

Facinitated

## Gender gaps in learning outcomes: striking differences between boys and girls in literacy and numeracy skills.

- Fifty percent of boys and $37 \%$ of girls were able to read at least Urdu sentences.
- Fifty-eight percent of boys and $43 \%$ of girls were able to correctly read English language words and sentences.
- Similarly, $53 \%$ of boys and $38 \%$ of girls were able to do subtraction or division problems.

## A small proportion of 'out-of-school' children are at more than 'beginner' competency levels.

- Data on reading ability of out-of-school children shows that $5 \%$ of out-of-school children could read a story in Urdu while 82\% of these children were found to be at the beginner level.
- English reading and comprehension competencies were also found in some out-of-school children. Although $83 \%$ of these children were at beginners' level, some $9 \%$ were able to read words and sentences.
- In arithmetic almost 5\% out-of-school children were able to do division sums while $81 \%$ were at the beginner level.

Only 21\% of mothers in the sampled households had completed primary schooling.

- Out of the total mothers in the sampled households, $79 \%$ had not completed primary schooling.
- Fathers who had completed primary schooling greatly outnumbered mothers at $52 \%$.

## Khyber Pakhtunkhwa (Rural)

Private tuition incidence and uptake is more prevalent among private school students than with their government school counterparts.

- Around $19 \%$ of all private school going children take paid tuition but only $2 \%$ of all government school children do so.
- Children in all classes of private schools undertake private tuition. In Class 1, 16\% of private school children take paid tuition and in Class 10 of private schools this percentage has risen to $22 \%$.
- In government schools, the incidence of tuition-taking increases with class-level. Four percent of children in Class 10 take paid tuition as compared to $2 \%$ in Class 1 .

| Class-wise \% children attending paid tuition |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Type | I | II | III | IV | V | VI | VII | VIII | IX | X |
| Govt. | 1.9 | 1.5 | 2.3 | 2.6 | 2.4 | 2.7 | 3.0 | 2.9 | 4.2 | 3.9 |
| Pvt. | 15.8 | 20.3 | 18.1 | 18.5 | 20.6 | 19.5 | 20.4 | 17.5 | 24.9 | 21.9 |

Twenty different languages are used in the households in KP.

- ASER 2012 survey reveals that 20 different languages were used in the households in KP.
- Two languages used commonly were; Pashto (77\%) and Hindko (11\%).
- Eleven percent of the remaining households used other languages ${ }^{4}$.

## The most preferred language for medium of instruction was Pashto.

- Each household surveyed was asked about their preferred medium of instruction for their children in schools.
- Forty-five percent of all the households surveyed preferred Pashto as the medium of instruction in schools.
- Urdu was preferred by on $39 \%$ of the surveyed households and $16 \%$ preferred English.

[^2]
## The official medium of instruction of the schools attended by surveyed children was English, Urdu or Pashto.

- Each child was also asked the medium of instruction in their respective schools.
- Seventy percent of the children in private schools reported English as their medium of instruction while 23\% had Urdu and $7 \%$ had Pashto.
- Three percent of the children in public schools reported having English, 66\% had Urdu and 30\% had Pashto.
- The medium of instruction for each school visited was also asked during the survey.
- Amongst the surveyed government schools, $81 \%$ were
 Urdu medium and $19 \%$ were Pashto medium schools.
- Ninety percent of the private schools surveyed had English medium of instruction, 7\% were Urdu medium, and $3 \%$ were Pashto medium schools.

## Fifteen percent children in government schools were absent.

Student attendance is recorded by taking a head count of all students present in schools on the day of visit.

- Overall student attendance in government schools stood at $85 \%$.
- The overall attendance in private schools is $87 \%$ as per the headcount.

| Attendance (\%) on the day of visit |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Government schools |  |  |  |  | Private schools |  |  |  |  |
|  | Primary | Elementary | High | Others | Overal | Primary | Elementary | High | Others | Overall |
| Children attendance | 85.3 | 74.8 | 86.2 | 86.1 | 85.2 | 86.0 | 87.3 | 87.5 | 83.0 | 87.1 |
| Teacher attendance | 87.7 | 85.8 | 89.1 | 83.4 | 86.5 | 84.7 | 90.5 | 88.4 | 77.3 | 88.1 |

## Thirteen percent teachers in government schools and 12\% teachers in private schools were absent.

Teacher attendance is recorded by referring to the appointed positions in each school and the total number of teachers actually present on the day of survey.

- Overall teacher attendance in government schools stood at $87 \%$ and $88 \%$ in private schools.

Forty-five percent of government schools surveyed had Class 2 students sitting together with other classes.

- The surveyors were asked to observe if Class 2 and Class 8 were sitting together with any other classes. This is referred to as multi-grade teaching, where one teacher has to teach more than one grade within the allotted time.
- It was found that $45 \%$ of the surveyed government schools and $16 \%$ of the surveyed private schools had Class 2 sitting with other classes.
- Similarly, $14 \%$ of surveyed government schools and $16 \%$ of surveyed private schools had Class 8 sitting with other classes.

## Khyber Pakhtunkhwa (Rural)

More qualified teachers in government schools.

- Forty-four percent of the teachers in government schools had post-graduate degrees, while private schools had only $28 \%$ teachers who did.
- Fourteen percent of the teachers had Masters in Education in government schools, while only 8\% of the teachers in private schools had the same degree.

| Teacher qualification - general (\% of teachers) |  |  | Teacher qualification - professional (\% of teachers) |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Useable toilet | 59.7 | 56.6 | 68.9 | 62.7 | 85.5 | 91.1 | 93.0 | 81.8 |  |

## Khyber Pakhtunkhwa (Rural)

Larger proportion of private primary schools had playgrounds and boundary walls as compared to government primary schools.

- Among the government primary schools surveyed $25 \%$ had a playground within the school premises compared to $44 \%$ of private primary schools that had a playground.
- Boundary walls were found in $74 \%$ of the surveyed government schools and $87 \%$ in private primary schools.
- In ASER 2011, 71\% of the surveyed government primary schools and $85 \%$ of the surveyed private schools were found with a boundary wall.

Playground and boundary wall facility in primary schools

| School facilities (\% schools) |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
