ater and toilet facility in primary schools -2011 - 2012

## Punjab (Rural)

## Sample Composition

- The ASER 2012 survey was conducted in all 36 districts of Punjab. This covered 21,478 households in 1,074 villages in the province.
- Detailed information was collected on 58,943 children ( $56 \%$ male, $44 \%$ female) aged $3-16$ years. Out of these, children aged 5-16 were also tested for language and arithmetic competencies.
- School information on both public and private schools was collected. A total of 1,756 schools were surveyed, out of which 1,066 were government (44\% primary, $25 \%$ elementary, $28 \%$ high, $3 \%$ others ${ }^{1}$ ) and 690 were private schools ( $20 \%$ primary, $52 \%$ elementary, $24 \%$ high, $4 \%$ others).
- Fifty-two percent of the government schools were boys only, $29 \%$ were girls only, and $19 \%$ were coeducation schools. Four percent of the private schools were boys only, $5 \%$ were girls only, and $91 \%$ were coeducation schools.

## A large number of children continue to be out of school: sixteen percent of all school-aged children in Punjab are out of school.

- Of all children aged $6-16$ years, $84 \%$ are reported being enrolled in schools.
- Sixteen percent of all school-aged children have either dropped out of school (7\%) or have never been enrolled in a school (9\%). ASER 2011 showed the same percentage of children to be out-of-school in Punjab; this reflects persistent access issues for some children in rural Punjab.
- Equal percentage of girls and boys are out-ofschool in 2012 as compared to more girls than boys being out-of-school in 2011.
- For every seventeen children in Class 1, there are only four children in Class 10.

${ }^{1}$ Other type of schools include classes 6-8, 1-12, 3-8, 6-10, 4-12, 5-10.

| \% Children in different types of schools |  |  |  |  | \% Out-of-school |  | Total |

| By type | 67.4 | 30.0 | 1.5 | 1.1 |  |  | 100 |

* In 2011, 28 districts of Punjab were surveyed.

## Punjab (Rural)

## Private schools absorb a large share of school-aged children: thirty-three percent of all schoolgoing children are enrolled in non-state schools in Punjab.

- Forty-two percent of the children enrolled in private schools are girls and 58\% are boys.
- Approximately $2 \%$ of the total school-attending population attends madrasah schools and 1\% children attend other non-formal institutes.

Approximately half of the pre-primary age children are not attending any form of schooling.

- A total of 12,682 children aged from three to five were reached during the ASER 2012 survey in Punjab.
- Consistent with last year's results, $49 \%$ of children aged 3-5 did not attend any form of pre-primary education.
- Of the children who do attend pre-primary education, $57 \%$ are enrolled in public institutions and $43 \%$ in private institutions.

| $\%$ Children who attend different types of pre-schools |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Learning levels of children are assessed through specific language and arithmetic tools. The same approach is used for all children between the ages of 5 to 16 . The literacy assessments are designed to cover up to Class 2 level according to the national curriculum. The arithmetic tool covers up to Class 3 level.

## Learning levels have improved since last year but still remain poor: thirty-three percent children from Class 5 still cannot read Class 2 Urdu story.

- Analysis of reading ability shows that $57 \%$ of Class3 students were able to read sentence and nearly $43 \%$ could not.
- InASER 2011,61\% of Class 5 students were reported as being able to read a story compared to $67 \%$ of Class 5 students who could in 2012.

| Class-wise \% children who can read |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Improvements can be seen in English competencies over the past year: sixty-one percent of Class 5 children were able to read Class 2 level English sentences as compared to 50\% last year.

- In ASER 2011, 50\% of Class 5 students were reported as being able to read sentences compared to $61 \%$ of Class 5 students who can read sentences in 2012.
- Sixty-one percent of Class 5 children and $75 \%$ of Class 6 children were able to accomplish Class 2 English sentence tasks.

Children who can do division

## Students in private schools outperform students in government schools.

- Sixty-five percent of Class 5 students in government schools were able to read a story in Urdu (the highest level of competency tested) compared to $71 \%$ of Class 5 students in private schools.
- In English, 59\% of Class 5 students in government schools were able read sentences compared to $68 \%$ of Class 5 students in private schools.
- This pattern of better performance among private school students is also reflected in arithmetic. Sixtyone percent of Class 5 private school children were able to do division problems of Class 3 (the highest competency tested) as against $54 \%$ of Class 5 government school children.

## Punjab (Rural)

## Gender gaps in learning outcomes: significant differences between boys and girls in literacy and numeracy skills.

- Fifty-fivepercent of boys and $52 \%$ of girls were able to read at least Urdu sentences.
- Fifty-nine percent of boys and $55 \%$ of girls were able to correctly read English language words and sentences.
- Similarly, $53 \%$ of boys and $49 \%$ of girls were able to do subtraction or division problems.

## A modest proportion of 'out-of-school' children are at more than 'beginner' competency levels.

- Data on reading ability of out-of-school children shows that $12 \%$ of them could read a story in Urdu while $66 \%$ of these children were found to be at the beginner level.
- English reading and comprehension competencies were also found in out-of-school children. While 70\% of children were at beginners' level, $18 \%$ were able to read words and sentences.
- In arithmetic almost 10\% out-of-school children were able to do division sums while $65 \%$ were at the beginner level.

Only $33 \%$ of mothers in the sampled households had completed primary schooling.

- Out of the total mothers in the sampled households, $67 \%$ had not completed primary schooling.
- The data shows that $56 \%$ fathers in the sampled households had completed primary schooling.

## Punjab (Rural)

## Private tuition incidence and uptake is more prevalent among private than government school students.

- Around $34 \%$ of private school-going children take paid tuition while $17 \%$ of government school children do so.
- Children across all private school classes undertake private tuition. In Class 1,33\% of private school children take paid tuition and in Class 10 of private schools this percentage has risen to $38 \%$.
- In government schools, the incidence of tuition-taking increases with class-level. Thirty percent of children in Class 10 take paid tuition as compared to $11 \%$ in Class 1.

| Class-wise \% children attending paid tuition |  |  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Nineteen different languages are used in the households in Punjab.

- ASER 2012 survey findings revealed that 19 different languages were used in the surveyed households of Punjab.
- Three languages used commonly were; Punjabi (65\%), Siraiki (21\%) and Urdu (9\%).
- Five percent of the remaining households used other languages ${ }^{4}$.

## The most preferred language for medium of instruction was Urdu.

- Each household surveyed was asked their preferred medium of instruction for their children in schools.
- Fifty-six percent of all the households surveyed preferred Urdu as the medium of instruction in schools.
- Home language was preferred by $13 \%$ of the households and $31 \%$ preferred English.

[^1]
## Punjab (Rural)

The official medium of instruction of the schools attended by surveyed children was English or Urdu.

- Each child was also asked the medium of instruction in their respective schools.
- Fifty percent of the children in government schools reported English as their medium of instruction and 50\% had Urdu.
- Sixty-five percent of the children in private schools reported having English as their medium of instruction and $35 \%$ had Urdu as their medium of instruction.
- The medium of instruction for each school visited was also asked during the survey.

- Of all the surveyed government schools in Punjab, 69\% of them were English medium, 30\% were Urdu medium, and 1\% had other medium of instruction.
- Sixty-seven percent of the surveyed private schools had English as their medium of instruction, 30\% were Urdu medium, $2 \%$ were other mediums, and less than one percent were Hafiz-e-Quran schools.

## Fourteen percent of the children in government schools were absent.

Student attendance is recorded by taking a head count of all students present in schools on the day of visit.

- Overall student attendance in government schools stood at 86\%.
- The overall attendance in private schools is $86 \%$ as per the headcount.

| Attendance (\%) on the day of visit |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Government schools |  |  |  |  | Private schools |  |  |  |  |
|  | Primary | Elementary | High | Others | Overal | Primary | Elementary | High | Others | Overall |
| Children attendance | 84.7 | 86.3 | 86.7 | 90.6 | 86.4 | 85.3 | 85.7 | 86.7 | 82.6 | 85.9 |
| Teacher attendance | 86.5 | 87.9 | 86.7 | 88.1 | 87.1 | 88.3 | 87.9 | 87.4 | 90.6 | 87.7 |

Twelve percent and 13\% teachers in private and government schools respectively were absent.
Teacher attendance is recorded by referring to the appointed positions in each school and the total number of teachers actually present on the day of survey.

- Overall teacher attendance in government schools was $87 \%$ and $88 \%$ in private schools.

## Thirty-six percent of government schools surveyed had Class 2 students sitting together with other

 classes.- The surveyors were asked to observe if Class 2 and Class 8 were sitting together with any other classes. This is referred to as multi-grade teaching, where one teacher has to teach more than one grade within the allotted time.
- It was found that $36 \%$ of the surveyed government schools and $34 \%$ of the surveyed private schools had Class 2 sitting with other classes.
- Similarly, $14 \%$ of surveyed government schools and $30 \%$ of surveyed private schools had Class 8 sitting with other classes.

## Punjab (Rural)

More qualified teachers in government schools.

- Forty-one percent of the teachers in government schools had post-graduate degrees, while private schools had only $17 \%$ teachers with master's degrees.
- Eighteen percent of the teachers had Masters in Education in government schools, while only $12 \%$ of the teachers in private schools had the same degree.

| Teacher qualfication - general (\% of teachers) |  |  |  | Teacher qualification - professional (\% of teachers) |  |  |
| :--- | :---: | :---: | :--- | :---: | :---: | :---: |
|  | Government schools | Private schools |  | Government schools | Private schools |  |

| Useable toilet | 86.8 | 92.6 | 94.2 | 88.2 | 91.5 | 95.5 | 97.5 | 100.0 |  |

## Punjab (Rural)

## Larger proportion of private primary schools had boundary walls as compared to government primary schools.

- Among the government primary schools surveyed $48 \%$ had a playground within the school premises compared to $37 \%$ of private primary schools that had a playground.
- Boundary walls were found in $81 \%$ of the surveyed government schools and $92 \%$ of the private primary schools.
- In ASER 2011, 76\% of the surveyed government primary schools and $88 \%$ of the surveyed private schools were found with a boundary wall.

| School facilities (\% schools) |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Government schools | Private schools |  |  |  |  |  |  |
|  | Primary | Elementary | High | Others | Primary | Elementary | High | Others |
| Playground | 48.2 | 66.5 | 75.0 | 78.7 | 36.7 | 43.5 | 50.9 | 59.2 |
| Boundary wall | 80.6 | 83.2 | 86.0 | 79.4 | 92.3 | 96.4 | 96.3 | 100.0 |

Eleven rooms on average were being used for classroom activities in surveyed government high schools.

- Government primary schools had 3 rooms on average that were used for classes, while private primary schools had 4.
- Seven rooms on average were being used in government and private elementary schools.
- In case of high schools, both types of schools had 11 rooms on average for classroom activity.

| School facilities - Average number of rooms used for classes |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Primary | Elementary | High | Others | Primary | Elementary | High | Others |  |
| Rooms used for classes (avg.) | 2.8 | 6.6 | 11.1 | 11.6 | 4.3 | 7.4 | 10.9 | 5.7 |  |

Eighty-eight percent of the government primary schools had received grants in the previous year.

- In 2011, among the government schools surveyed, 408 (88\%) primary schools, 251 (93\%) elementary and 238 (81\%) high schools had received grants.
- The proportion of schools receiving grants (46\%) in 2012 (first 4 months of the fiscal year) was less than 2011 (55\%).

| School Grants |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Government schools |  |  |  | Private schools |  |  |  |

[^0]:    ${ }^{2}$ ITA has developed detailed documents on the tools development process. The tools are developed after analyzing national textbooks and in consultation with expert groups at the provincial and national level. They are then piloted intensively before use to ensure comparability, consistency and reliability across provinces and over time.
    ${ }^{3}$ Thirteen rural districts of Punjab were surveyed in 2010 as compared to 28 rural districts in 2011.
